DATE MAILED: 12/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

DETAILED ACTION

This Office Action is in response to applicants' amendment including Rule 1.132 Affidavit, filed on 09/06/2005. Claims 33-77 are pending in the Action.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 33 and 52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language. These claims are omnibus type claims.

Claims 33 and 52 recite "one or more ... (C) prediction models (D) actual performance measurements ... at least two different simulations". These recitations are being indefinite for what they fail to point a specific combination for performance analysis, measurement, and simulation.

Claim 33 fails to show step to perform different simulations for display in step (C).

3. Claim 52 recites "a computer including (D) actual performance measurements taken from the physical environment ..." It is unclear for how the computer system includes actual performance measurements. Does the computer require another measurement device for taking measurement? Or does the computer take measurements by itself?

Art Unit: 2128

4. Claim 52 recites "a selector for selecting specific components ... " How the selector would be able to select specific components in a plurality of system components. The claim does not show a model selection representation for selecting components.
5. Claims 35-39, 41-42, 54-58, 60-61, and 74 recite the limitation "said one or more icons". There is insufficient antecedent basis for this limitation in the claims.
6. Claim 38 recites the limitation "the functionality of one or more watch points". There is insufficient antecedent basis for this limitation in the claim.
7. Claim 39 recited the limitation "the functionality of a grid of watch points". There is insufficient antecedent basis for this limitation in the claim.
8. Claim 57 recites the limitation "the functionality of one or more watch points". There is insufficient antecedent basis for this limitation in the claim.
9. Claims 62-63 recite the limitation "the group consisting of ..." There is insufficient antecedent basis for these limitations in the claims.
10. Claim 66 recites the limitation "the measurement device group consisting of ..." There is insufficient antecedent basis for this limitation in the claim.

Response to Arguments

Applicant's arguments with respect to claims 33-77 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

1. US patent no. 6,317,599 B1, issued to Rappaport et al, on Nov. 2001
2. US patent no. 6,356,841 B1, issued to Hamrick et al, on Mar. 2002

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thai Q. Phan whose telephone number is 571-272-3783.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kamini Shah can be reached on 571-272-2279. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
